SUMMARY

Full-stack and Unity developer skilled in JavaScript, React, Python/Django, Unity 3D, and C#. Recent Nashville Software School graduate with hands-on experience building web apps, mobile games, and developer tools. Strong problem-solving ability backed by business ownership and client-facing experience.

TECHNICAL SKILLS

Web: JavaScript, React, Next.js, Node.js, Django, HTML/CSS, Bootstrap
Game: Unity 3D, C# scripting, physics & particle systems, mobile optimization
Databases: Firebase/Firestore, SQLite, SQL
Tools: Git/GitHub, REST APIs, Postman, Agile/Scrum

PROJECTS

Catch Me If You Can – 3D Chase Game | Unity, C#

Built mobile-compatible chase game with custom physics & AI cop behavior. Implemented particle effects, collision feedback, and health system. Deployed cross-platform builds (mobile + desktop). Live Demo: [Catch Me If You Can](#)

Putter – Golf Social Application | React, Next.js, Firebase

Created Tinder-style matching system for golfers. Implemented real-time database sync and authentication. Designed responsive UI with modern component architecture. Live Demo: [fairwayfriends.netlify.app](#)

Let's Eat – Restaurant Selector | Django, React, REST APIs

Developed full-stack app with relational database + custom API. Built CRUD operations and seamless frontend/backend data flow. Live Demo: [clientletseat-production.up.railway.app](#)

EDUCATION

Nashville Software School – Nashville, TN
Full-Stack Software Development Bootcamp | Sept 2023 – Sept 2024

EXPERIENCE

Owner | Winhart Garage Doors – Nashville, TN | 2022–Present

Managed contracts, client relations, and project timelines. Maintained documentation and oversaw financial operations.

Technician | Precision Garage Doors – Nashville, TN | 2018–2022

Performed technical installations and troubleshooting. Built strong problem-solving and customer service skills.
